CONTENTS

Volume 8, Issue Nos. 1–12 (1988)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, January

Improved Relaxation Schemes for Transonic Potential Calculations: M. Hafez and D. Lovell 1

Computation of Three-dimensional Transonic Flows using Two Stream Functions: A. Sherif and M. Hafez 17

Entropy and Vorticity Corrections for Transonic Flows: M. Hafez and D. Lovell ... 31

Analysis of Convective Diffusion Problem with First-order Chemical Reaction by Boundary Element Method: N. Okamoto 55

A Boundary-type Finite Element Model for Water Surface Wave Problems: K. Kashiyama and M. Kawahara 65

A Numerical Method for Acoustic Oscillations in Tubes: J. M. Gary 81

Numerical Solution of a Free Surface Problem by a Boundary Element Method: J. M. Aitchison and A. Karageorghis 91

Flux Difference Splitting for the Euler Equations in One Spatial Co-ordinate with Area Variation: P. Glaister 97

CONFERENCE DIARY 121

Issue No. 2, February

A Finite Element Convergence Study for Shear-thinning Flow Problems: A. Karagiannis, H. Mavridis, A. N. Hrymak and J. Vlachopoulos 123

A Boundary Element Formulation for Natural Convection Problems: K. Kitagawa, L. C. Wrobel, C. A. Brebbia and M. Tanaka 139

Indexed or abstracted by 'Applied Mechanics Reviews', 'Cambridge Scientific Abstracts', 'CITIS—Civil Engineering Abstracts', 'Current Contents', 'Engineering Index', 'Eng. Societies Library', 'BHRA Fluid Engineering Centre', 'Geo Abstracts', 'INSPEC', 'Mathematical Reviews', 'Mechanics', 'Shock & Vibration Digest' and 'Zentralblatt für Mathematik'.

Identification of Non-Darcy Groundwater Flow Parameters: I. M. Goodwill and C. Kalliontzis 151

Unsteady Boundary Layer and its Separation Over a Heated Circular Cylinder: J. S. Kim and K. S. Chang 165

A Method for Generating Irregular Computational Grids in Multiply Connected Planar Domains: N. P. Weatherill 181

A New Fluid-structure Interaction Analysis Based on Higher-order Boundary Elements: G. E. Hearn and E. Donati 199

The Boundary Integral Equation Method for the Solution of Wave-obstacle Interaction: K. J. Williams 227

CONFERENCE DIARY 243

ANNOUNCEMENT 245

Issue No. 3, March

Laminar Natural Convection in a Partially Divided Rectangular Cavity at High Rayleigh Number: K. H. Winters 247

Preconditioned Conjugate Gradients for Solving the Transient Boussinesq Equations in Three-dimensional Geometries: S. Dupont and J. M. Marchal 283

Turbulent Flow in a Tube Containing an Offset Rod: C. W. Rapley 305

A Flux-vector Splitting Method for Steady Navier–Stokes Equations: E. Dick 317

The Numerical Solution of Stokes Flow in a Domain with Re-entrant Boundaries by the Boundary Element Method: A. K. Mitra and M. S. Ingber 327

Two-dimensional Analysis of Pressure Transients in Pipelines: G. K. Nathan, J. K. Tan and K. C. Ng 339

A Total Linearization Method for Solving Viscous Free Boundary Flow Problems by the Finite Element Method: N. P. Kruyt, C. Cuvelier, A. Segal and J. van der Zanden 351

ANNOUNCEMENTS 365

CONFERENCE DIARY 367

Issue No. 4, April

REFEREES FOR 1987 iii

Transient Three-dimensional Flow in an Enclosure with a Hot Spot on a Vertical Wall: D. Kuhn and P. H. Oosthuizen 369

Examination of Pressure Oscillations Arising in the Computation of Cascade Flow using a Boundary-fitted Co-ordinate System: B. L. Lapworth 387

Numerical Solutions of High-*Re* Recirculating Flows in Vorticity–velocity Form: G. Guj and F. Stella 405

A Multigrid Method for Recirculating Flows: S. Sivaloganathan and G. J. Shaw . 417

On the Smoothing Properties of the Simple Pressure-correction Algorithm: G. J. Shaw and S. Sivaloganathan 441

A Navier–Stokes Code for S-shaped Diffusers—a Review: A. L. Loeffler, Jr. 463

Computation of Complex Fluid Flows using an Adaptive Grid Method: W. Shyy 475

CONFERENCE DIARY 491

Issue No. 5, May

A Petrov–Galerkin Method for the Numerical Solution of the Bradshaw–Ferriss–Atwell Turbulence Model: I. B. Stewart and K. Unsworth 493

Forces on Oscillating Bodies in Viscous Fluid: P. G. Pattani and M. D. Olson 519

A Collocation Method Over Staggered Grids for the Stokes Problem: C. Bernardi and Y. Maday 537

Boundary-type Finite Element Method for Wave Propagation Analysis: M. Kawahara, H. Sakurai and K. Kashiyama 559

Laminar Flow and Heat Transfer in a Periodically Converging–diverging Channel: V. K. Garg and P. K. Maji 579

Generalized Potential Flow Theory and Direct Calculation of Velocities Applied to the Numerical Solution of the Navier–Stokes and the Boussinesq Equations: W. Zijl 599

CONFERENCE DIARY 613

ANNOUNCEMENTS 615

Issue No. 6, June

Curvature-compensated Convective Transport: Smart, a New Boundedness-preserving Transport Algorithm: P. H. Gaskell and A. K. C. Lau 617

On Variable Grids for Modelling Flow in Reciprocating Engines: P. Shah, N. C. Markatos and D. R. Glynn 643

Magnetohydrodynamic Flow Past a Porous Rotating Disk in a Circular Magnetic Field: S. K. Kumar, W. I. Thacker and L. T. Watson 659

Acceleration of the Pressure Correction Method for a Rotating Navier–Stokes Problem: G. Lonsdale and J. E. Walsh 671

Finite Element, Stream Function–Vorticity Solution of Secondary Flow in the Channels of a Rod Bundle: W. Slagter 687

Magnetohydrodynamic Flow in Electrodynamically Coupled Rectangular Ducts: M. Sezgin 705

Mixed Convection About a Non-isothermal Vertical Surface in a Porous Medium: K. N. Seetharamu and P. Dutta 723

BOOK REVIEW 737

CONFERENCE DIARY 739

ANNOUNCEMENTS 741

Issue No. 7, July

Magnetohydrodynamic Flow on a Half-plane: M. Sezgin 743

On the Self-induced Motion of Vortex Sheets: R. K. Bera 759

Non-linear Transient Phenomena in a Complex Recirculating Flow: A Numerical Investigation: C. J. Freitas and R. L. Street 769

Waves Generated by an Inclined-plate Wave Generator: Y.-C. Wu 803

A Frequency–Time Domain Finite Element Model for Tidal Circulation Based on the Least-squares Harmonic Analysis Method: J. J. Westerink, J. J. Connor and K. D. Stolzenbach 813

Comparison of Two Numerical Methods for the Solution of Non-Newtonian Flow in Ducts: T.-J. Liu, H.-M. Lin and C.-N. Hong 845

CONFERENCE DIARY 863

ANNOUNCEMENTS 865

Issue No. 8, August

Some Fast 3D Finite Element Solvers for the Generalized Stokes Problem: J. Cahouet and J.-P. Chabard 869

A Simple Numerical Technique for Transient Creep Flows with Free Surfaces: M. Golafshani 897

Prediction of Oscillating Thick Cambered Aerofoil Aerodynamics by a Locally Analytic Method: H.-W. D. Chiang and S. Fleeter 913

A Stable Least-squares Finite Element Method for Non-linear Hyperbolic Problems: B. N. Jiang and G. F. Carey 933

Axially Symmetric Cavitation Flow at Small Cavitation Numbers: A. Dagan 943

On the Accuracy of Least-squares Finite Elements for a First-order Conservation Equation: P. Wilders 957

Two-equation (k, ε) Turbulence Computations by the Use of a Finite Element Model: T. Utnes 965

Improving the Accuracy of the Least-squares Finite Element Approximation of the Linearized Steady Euler Equations by an Embedding Method: P. Wilders 977

CONFERENCE DIARY 989

ANNOUNCEMENTS 991

Issue No. 9, September

SPECIAL NOTE
A Note on Numerical Accuracy: J. H. Ferziger 995

Finite Element Computation of a Turbulent Flow Over a Two-dimensional Backward-facing Step: A. Autret, M. Grandotto and I. Dekeyser 997

The Free Surface Flow of Newtonian and Non-Newtonian Fluids Trapped by Surface Tension: D. M. Tidd, R. W. Thatcher and A. Kaye 1011

Dirichlet and Neumann Boundary Conditions for the Pressure Poisson Equation of Incompressible Flow: S. Abdallah and J. Dreyer 1029

Space Conservation Law in Finite Volume Calculations of Fluid Flow: I. Demirdžić and M. Perić 1037

Non-linear Free Surface Flows and an Application of the Orlanski Boundary Condition: S. Jagannathan 1051

Wave Equation Hydrodynamics on Deforming Elements: G. L. D. Sidén and D. R. Lynch 1071

A Shock-capturing Scheme for Body-fitted Meshes: P. Glaister 1095

The Stability of Spectral Schemes for the Large Eddy Simulation of Channel Flows: D. C. Leslie and S. Gao 1107

CONFERENCE DIARY 1117

ANNOUNCEMENTS 1119

Issue No. 10, October

Special Issue

These selected papers are extended and refereed versions of those presented at the Fifth International Conference on Numerical Methods in Laminar and Turbulent Flow Montreal, Canada, 6–10 July 1987

A Spectral Multi-domain Technique for Viscous Compressible Reacting Flows: M. G. Macaraeg and C. L. Streett 1121

Generation of Three-dimensional Unstructured Grids by the Advancing-front Method: R. Löhner and P. Parikh 1135

Onset of Transition in Boundary Layers: T. Herbert 1151

A Control Point Form of Algebraic Grid Generation: P. R. Eiseman 1165

Linear and Non-linear Mechanisms in Boundary Layer Turbulence: M. T. Landahl 1183

Two-dimensional Compressible Navier–Stokes Finite Volume Computations by Means of Implicit Schemes: Y. Marx and J. Piquet 1195

Comparison of Two Solution Strategies for use with Higher-order Discretization Schemes in Fluid Flow Simulation: P. H. Gaskell, A. K. C. Lau and N. G. Wright 1203

The Application of Multigrid to Navier–Stokes Simulation of 3D Flow in Axial and Radial Flow Turbomachinery: W. N. Dawes 1217

On Finite Element Approximations of the Streamfunction–Vorticity and Velocity–Vorticity Equations: M. D. Gunzburger and J. S. Peterson 1229

Numerical Simulation Methods of Incompressible Flows and an Application to the Space Shuttle Main Engine: J. L. C. Chang, D. Kwak, S. E. Rogers and R.-J. Yang 1241

Petrov–Galerkin Methods on Multiply Connected Domains for the Vorticity–Stream Function Formulation of the Incompressible Navier–Stokes Equations: T. E. Tezduyar, R. Glowinski and J. Liou 1269

Simple High-accuracy Resolution Program for Convective Modelling of Discontinuities: B. P. Leonard 1291

Evaluation of Navier–Stokes and Euler Solutions for Leading-edge Separation Vortices: K. Fujii, S. Gavali and T. L. Holst 1319

Spatial Marching Techniques for Approximate Solutions to the Hypersonic Blunt Body Problem: F. G. Blottner 1331

Eulerian–Lagrangian Methods for the Navier–Stokes Equations at High Reynolds Number: V. Casulli 1349

CONFERENCE DIARY 1361

ANNOUNCEMENTS 1363

Issue No. 11, November

A Unified Approach to Direct and Inverse Boundary Layer Solutions: K. C. Kaufman and G. H. Hoffman 1367

Dynamics of Non-Newtonian Fluid Interfaces in a Porous Medium: Incompressible Fluids: H. Pascal and F. Pascal 1389

Unsteady Viscous Flow over a Grooved Wall: A Comparison of Two Numerical Methods: S. C. Hung and R. B. Kinney 1403

Accuracy of a Deterministic Particle Method for Navier–Stokes Equations: J. P. Choquin and B. Lucquin-Desreux 1439

SHORT COMMUNICATION

A Comment on the Paper 'Finite Difference Methods for the Stokes and Navier–Stokes Equations' by J. C. Strikwerda: P. J. Roache 1459

CONFERENCE DIARY 1465

ANNOUNCEMENTS 1467

Issue No. 12, December

Special Issue
These selected papers are extended and refereed versions of those presented at the 1st FIDAP Users Conference
Chicago, Illinois, U.S.A. 13–15 September 1987

Evaluation of FIDAP on Some Classical Laminar and Turbulent Benchmarks: J. L. Sohn 1469

The Analysis of Glass Melting Processes Using Three-dimensional Finite Elements: R. A. Murnane, W. W. Johnson and N. J. Moreland 1491

A Finite Element Model for the Dissolution of Corrosion Pits in the Presence of Fluid Flow: J. N. Harb and R. C. Alkire 1513

Heat Exchanger Analysis on a MICROVAX II/GPX: A. F. Haught 1523

Developing Flows in Narrow Channels, Containing Heated Obstacles: D. Torok and R. Gronseth 1543

Finite Element Simulation of 3D Turbulent Free Shear Flows: D. Pelletier and R. Camareo 1563

CONFERENCE DIARY 1587

ANNOUNCEMENT 1588
